

How Unisys aligns with Amazon Web Services

Cloud Migration and Acceleration

Mitigates challenges with proven technology, methodology, processes and expertise with desired speed and security.

FinOps

Tracks and optimizes your cloud spending while maximizing return on your cloud investment and minimizing unnecessary expenses.

Application Modernization

Transforms legacy applications to roll out new features and integration in a matter of days and invest in innovation rather than maintaining the status quo.

Cybersecurity Solutions on AWS

Provides industry-leading Zero Trust security for cloud workloads running both on-prem and in the AWS public cloud.
