

9 AIRPORT CYBERSECURITY **VULNERABILITIES** THAT HACKERS ARE AFTER

- 01** Access credentials of airport staff, contractors and partners 
- 02** Airport corporate systems that perform enterprise functions 
- 03** Airport facilities like Wi-Fi and PCs open to public access 
- 04** Legacy systems and devices that support core airport operations 
- 05** Remote access and control over the IT and OT systems in an airport 
- 06** Modern devices used to enhance passenger service and airport operations 
- 07** Specialized systems and equipment that cannot be secured via conventional security solutions 
- 08** Gaps created when physical, cyber and biometric solutions do not work together seamlessly 
- 09** Convergence of IT and OT networks where less secure OT networks can open up IT networks to attacks
