

Securing Sensitive Research to Provide Safer, Cleaner Energy to the World

Success Story

Business Challenge

Prevent unauthorized access to and throughout the 180-hectare research facility aimed at developing a safe, limitless and environmentally responsible energy source.

Solution

Unisys Cybersecurity Solutions, including design and support services (via a Unisys-led consortium) for an integrated solution spanning perimeter and surveillance security, identity and access management, circulation control and monitoring, communication security, forensics, and human factor integration.

Results and Benefits

- Completed a thorough analysis of complex interactions of many stakeholders, resulting in an appropriate design of the physical security
- Achieved a completely secure environment for the world's largest experimental fusion facility
