

## Guarding Competitive Research that Improves Lives Through Food, Energy and the Environment

### **The Business Challenge.**

Protect systems, data and intellectual property that are critical to providing safe and sufficient food, ample and sustainable energy, and protection for people and the environment.

### **The Solution.**

Unisys Stealth® to secure valuable assets by cloaking critical process systems and isolating legacy systems, protect sensitive data from internal and external threats by limiting access to those with a need-to-know basis, and comply with the US Department of Homeland Security's specified anti-terrorism standards.

### **Results and Benefits.**

- Reduced the deployment, administration, and upgrade costs of traditional security infrastructure
- Minimized disruptions and delays of R&D initiatives and daily operations
- Gained compliance to government and industry standards
