

Cloud migration and transformation

Turn your cloud plans into reality

Highlights

Solution:

Unisys hybrid cloud migration and digital transformation services – execute your multi cloud strategy securely and cost effectively

Platforms:

CloudForte® Navigator™ – Prepare migration and transformation designs by doing a guided, top-down analysis of all of your current systems

CloudForte Accelerators – Leverage custom cloud templates for secure and performance driven cloud deployments

CloudForte Containers – Simplify and secure cloud-native microservices

CloudForte Assure™ – Build continual compliance monitoring and remediation into every migration

Stealth(core)™ – Implement holistic security across any cloud and even across on-premises

Stealth(identity)™ – Replace multiple logins and authentication methods with cross-system Zero Trust identity management

Execute your cloud transformation and migrations with confidence with proven designs and best practices. When you partner with Unisys, you can make your cloud vision a reality.

Start by giving your organization the expertise and tools to assess, build, and migrate to the cloud rapidly. Next, optimize your applications to leverage the cloud on time and within your budget. Finally, and most importantly, build security and compliance into every step of your implementation.

With tested and agile builds, you can modernize your infrastructure, improve efficiency, lower costs, and increase reliability. You'll enhance your stakeholder experience and strengthen your operations with a solid framework to meet your business goals now and in the future.

Power your transformation to the cloud.

Give your organization the expertise and solutions to rapidly and securely migrate data, applications, and infrastructure to the cloud and optimize your environment on time and within budgets.

Execute your cloud journey with confidence. Tap into knowledge and expertise gained from thousands of cloud migrations and earned from real-world experience delivering solutions for highly regulated industries.

Why Unisys?

Unisys' global cloud experience spans 110 countries, dozens of vertical industries, and over 250 customers. With more than 1,300 AWS, Azure, and Google-certified experts that follow the latest industry best practices, we have expertise in migration, cloud-native solutions, PaaS, and SaaS to modernize your apps and maximize ROI.

How you benefit

Leverage Unisys talent, blueprints, cloud migration methodologies, and best-in-class products for application lifecycles, migration, and DevOps. When you work with Unisys, you'll tap into knowledge and expertise gained from thousands of cloud migrations and earned from real-world experience delivering solutions for highly regulated industries.

Security is built-in from the beginning of every cloud transition we deliver. You can monitor activity across your multi-vendor, multi-cloud environment from a central console. You'll automate the detection of anomalous configurations, errors, or data vulnerabilities. With Unisys, you adopt a security-first approach that protects your entire IT landscape.

Maximize value for every cloud dollar spent. Unisys cloud experts can help you determine how best to distribute resources and changes based on your goals. Our cloud migration and transformation services include complete budgets with stage-by-stage costs and timelines. We then optimize your migration and reduce time-to-deployment with customized cloud accelerators.
