U UNISYS

Is your endpoint environment ready for unified management?

Get insights into your organization's readiness in minutes.

Managing endpoints across devices, rooms and shared spaces demands visibility, control and efficiency to support productivity and sustainability goals.

Unisys Unified Endpoint Management (UEM) standardizes endpoint control, optimizes resource usage and reduces operational complexity across your digital workplace. It's how you maintain consistent control while delivering the experiences employees need.

Use this scorecard to assess where you stand and identify opportunities to modernize through UEM.

Rate your UEM readiness

Answer the questions below. Each "Yes" adds one point to your score, showing how ready your organization is for UEM. Your results will help you identify gaps and prioritize next steps.

Costs and finances

• Do you want more predictable life cycle, maintenance and support costs across devices and workspaces?	Yes	No
• Is your organization working to reduce energy consumption and operational costs through more efficient device and environment management?	Yes	No
• Is there budget allocated for endpoint modernization, including energy-efficient hardware, shared technology and IoT-enabled environments?	Yes	No
• Is your organization pursuing flexible, consumption-based technology models?	Yes	No
• Do you regularly review device, software and service contracts to identify redundancies, manage usage and improve cost efficiency across endpoints and shared environments?	Yes	No

Operational complexity

• Does your organization operate across multiple locations or regions?	Yes	No
• Do your employees require different workspace configurations based on their roles?	Yes	No
• Do you manage a mix of endpoints (laptops, mobile devices, meeting rooms, collaborative spaces, shared technology)?	Yes	No
• Do you support remote or hybrid workers across multiple device types and environments?	Yes	No
• Do you face challenges maintaining consistent performance, utilization or visibility across endpoints and spaces?	Yes	No

IT and facilities resources

	Yes	No
• Does managing endpoints and shared environments consume more than 30% of IT and facilities team time?	Yes	No
• Do day-to-day support demands limit your teams' ability to focus on strategic initiatives?	Yes	No
• Do you struggle to keep devices, meeting rooms and shared systems up to date and secure?	Yes	No
• Do you lack visibility into management strategies for non-traditional endpoints such as digital signage players, IoT sensors, smart environmental controls and other connected devices?	Yes	No
• Is there an opportunity to simplify how endpoints, rooms and workplace services are managed by moving to fewer systems?	Yes	No

User experience

	Yes	No
• Do employees experience friction accessing work applications and data across different devices or locations?	Yes	No
• Does downtime across devices or shared environments impact employee productivity?	Yes	No
• Do IT help desk tickets frequently relate to device issues, meeting room technology or shared workspace disruptions?	Yes	No
• Does it typically take two or more days to resolve endpoint- or workspace-related issues?	Yes	No
• Do you lack standardized device or workspace setups for similar job roles?	Yes	No
• Do employees need to contact multiple teams to resolve technology issues?	Yes	No

Readiness score

Add one point for each "Yes."

Yes	No

Calculate your readiness total on the next page.

Calculate your readiness total

0-5 points:
Establishing the foundation:

Opportunities exist to strengthen control, consistency and sustainability as your environment evolves. Start with focused discovery sessions to identify gaps, align stakeholders and plan next steps.

Partner with our advisory team to explore how UEM can support your growth and operational strategy.

6-11 points:
Positioned for targeted improvements

You have specific areas where UEM can deliver immediate value. Addressing shared endpoints, visibility gaps or life cycle inefficiencies can generate meaningful gains.

Connect with our advisory team to map your improvement strategy.

12-16 points:
Ready for strategic change

You show strong potential to benefit from a more unified approach to endpoint and workplace management. A phased UEM rollout can deliver early improvements while laying the foundation for broader optimization and sustainable outcomes.

Begin with a discovery workshop to translate your UEM readiness into measurable enterprise outcomes.

17-21 points:
Primed for transformation

You're positioned to benefit from UEM across devices, rooms and shared environments. A single management framework can improve efficiency, reduce risk and support sustainability goals. Through Unisys' collaborative workshop approach, we'll help you define your target state, establish predictable cost models and enhance digital workplace performance.

Schedule a discovery workshop to accelerate your UEM strategy and align stakeholders on enterprise-wide transformation.
