Score your space: The sustainable workplace reality check

Get instant insights into your readiness

Managing a sustainable workplace involves optimizing resources, improving employee satisfaction and reducing environmental impact. Smart building technologies and integrated workspace solutions can help organizations achieve these goals while reducing operational costs and enhancing productivity.

Check if you're on track for sustainable workplace transformation

Complete the questions in the checklist below and tally one point for each "Yes" answer. This score reflects your readiness for sustainable workplace initiatives. Use these results to surface key opportunities, qualify transformation potential and lay the groundwork for a comprehensive sustainability strategy.

Costs and finances

• Does your organization aim to reduce energy consumption and utility costs through smart building technologies?	Yes	No
• Is there a budget allocated for sustainability initiatives such as energy-efficient lighting, HVAC and IoT sensor integration?	Yes	No
• Do you want more predictable maintenance and operation costs for your workspace?	Yes	No
• Is your organization looking to move away from large up-front costs for workplace upgrades?	Yes	No

Operational complexity

• Do you manage workspaces with multiple components like meeting rooms, collaborative areas, visitor management systems and digital signage?	Yes	No
• Do you support remote or hybrid workers?	Yes	No
• Does your organization operate across multiple locations?	Yes	No
• Do you face challenges in managing workspace utilization and occupancy effectively?	Yes	No
• Do your employees require different workspace configurations based on their roles?	Yes	No

IT and facilities resources

• Does workspace management consume more than 30% of IT and facilities team time?	Yes	No
• Does routine workspace management prevent your teams from working on strategic initiatives?	Yes	No
• Do you struggle to keep up with workspace security updates and maintenance?	Yes	No
• Do you lack real-time visibility into your workspace inventory and status?	Yes	No
• Is there a need for streamlined systems to manage booking, wayfinding and visitor management?	Yes	No

User experience

• Do IT help desk tickets often relate to outdated or underperforming workspaces and equipment?		Yes	No
• Is workspace-related downtime impacting employee productivity?		Yes	No
• Does it typically take two or more days to address workspace-related issues?		Yes	No
• Do you lack standardized workspace setups across similar job roles?		Yes	No
• Do employees have to contact multiple teams to resolve workspace issues?		Yes	No

Calculate your readiness

Add one point for each "Yes" answer, then refer to the table below to understand your organization's readiness level.   Yes   No

15-20 points:
Prime for transformation

Your organization is perfectly positioned to benefit from a sustainable workplace strategy. Implementing smart building technologies and integrated workspace management can drive significant improvements in efficiency and employee satisfaction. Our collaborative workshop approach will help you design your optimal approach, create predictable cost structures, enhance resource management and deliver exceptional user experiences.

5-9 points:
Primed for targeted improvements

Your business has specific areas where a sustainable workplace strategy can create a meaningful impact. A customized approach targeting these areas first can yield significant benefits. Our advisory team can assist in mapping your transformation strategy.

10-14 points:
Ready for strategic change

Your organization shows strong potential for sustainability benefits across multiple areas. A phased implementation approach can help you achieve focused early wins and build a foundation for continuous improvement. We can help you design pilot programs and scalable solutions to reduce costs and optimize resource usage.

0-4 points:
Foundation for growth

Your current workspace management might meet today's needs, but opportunities exist to strengthen your foundation for future growth. Starting with focused workshops can help identify specific areas for improvement and plan for evolving workforce requirements. We can explore how a sustainable workplace strategy can support your growth goals.

Next steps for your sustainable workplace transformation

Turn your workplace assessment into measurable results. Our experts collaborate with your team to design sustainability strategies that reduce costs, optimize resources and enhance employee satisfaction. Start with our Sustainable Workplace solution brief to see what's possible, then connect with our advisory team or schedule a discovery workshop to create your customized roadmap for success.
