

Info sheet

Streamline, secure, and modernize banking operations

Unisys Core Banking

Deliver modern, secure customer experiences

Financial institutions must adapt rapidly to evolving customer expectations, comply with stringent regulations governing the handling of sensitive financial data, and compete effectively with other banks.

The Unisys Core Banking modernization solution, strengthened by added fraud prevention and biometrics capabilities, gives your institution the agility, security, and efficiency to meet those demands today and scale with confidence tomorrow. It supports open banking, advanced UI/UX, regulation adoption, and AI and machine learning for analysis and automation. You can also more easily meet your customers' expectations for accessing services.

Solution capabilities

Core banking forms the foundation of your financial services operations, and Unisys' solution delivers a combination of capabilities.

- Proprietary regional core banking solutions covering everything from regional banking to small and medium-sized enterprise banking and specialized mortgage solutions.

- Biometrics, behavioral analytics, and device intelligence, powered by FacePhi, to prevent identity theft, account takeover, and mule accounts with NIST-validated accuracy that reduces false positives and manual review effort.
- Simplified access to core system data and robotic process automation capabilities for recurring rule-based tasks.
- FacePhi's certified, auditable identity verification and real-time customer growth capabilities that reduce onboarding time to less than 10 seconds. Worldsys' automated customer and entity screening against politically exposed person records, sanctions, and watchlists helps ensure continuous compliance with LATAM and global regulatory requirements.
- Fraud prevention, risk mitigation, and financial, legal, and reputational data analytics, powered by Worldsys.
- Automated batch processing, ongoing monitoring, and API alerts by Worldsys, with audit-ready reporting that simplifies responses to regulatory inquiries.

What you'll gain

Modernizing your core banking systems increases business agility and customer loyalty, and delivers advantages across your business:

- Boost employee productivity with a refreshed user interface and user experience capabilities. This increases workforce performance, optimizes efficiency, and enhances client satisfaction.
- Apply data insights for strategic decision-making with the Core Banking solution's seamless integration with data lakes and third-party systems, delivering rich insights. This interconnectivity makes it easier to forecast results, understand customer needs, analyze transactional behavior, and enhance commercial management dashboards.
- Access robust capabilities that cover every aspect of banking operations. These include collections, accounting, payments, transfers, anti-money laundering, regulatory reporting, and the management of deposits, loans, customer service, and debit and credit cards.
- Strengthen cybersecurity with integrated fraud detection, identity verification, and risk monitoring built into your core banking operations.

Why Unisys?

Unisys brings decades of banking industry knowledge to guiding financial institutions toward achieving their business objectives. We are a trusted provider to financial institutions worldwide and specialize in core and branch banking solutions. Our expert consultants can move your business forward in the digital age and help you enhance your customers' banking experience.
