

VOLUNTARY PRODUCT ACCESSIBILITY TEMPLATE (VPAT)

The proposed solution consists of the Unisys Stealth® Product which has been ascertained as compliant with Section 508 of the amended Rehabilitation Act of 1973.

Summary Table

Criteria	Applicable Provisions	Notes	Total Supported Provisions			Explanation
			Fully	Partially	Not	
Unisys Stealth						
Section 1194.21 Software Applications and Operating Systems (12 Total Provisions)	Unisys Stealth	7		7		
Section 1194.22 Web-based Internet Information and Applications (16 Total Provisions)	Unisys Stealth	9		8	1	
Section 1194.23 Telecommunication s Products (14 Total Provisions)	Unisys Stealth	0	Not Applicable			Not a telecommunication product.
Section 1194.24 Video and Multi-media Products (5 Total Provisions)	Unisys Stealth	0	Not Applicable			Not a video or multi-media product.
Section 1194.25 Self-Contained, Closed Products (13 Total Provisions)	Unisys Stealth	0	Not Applicable			Not a self-contained system
Section 1194.26 Desktop and Portable Computers (4 Total Provisions)	Unisys Stealth	0	Not Applicable			Not a desktop computer.
Section 1194.31 Functional Performance Criteria (6 Total Provisions)	Unisys Stealth	3		2	1	
Section 1194.41 Information Documentation and Support	Unisys Stealth	3		2	1	

Section 1194.21 Software Applications and Operating Systems

ID	Criteria	Applicable	Notes	How does the EIT Meet this Requirement?	Explanation
a)	When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Yes		Supports	Enterprise Manager (EM) uses a keyboard for text entry and navigation. Results are displayed textually.
b)	Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Yes		Supports	EM does not disable or disrupt accessibility features.
c)	A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Yes		Supports	EM supports normal Windows operating system focus indications.
d)	Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Yes		Supports	EM does not interfere with Assistive Technology,
e)	When bitmap images are used to identify controls,	No			EM does not use bitmaps.

Section 1194.21 Software Applications and Operating Systems

ID	Criteria	Applicable	Notes	How does the EIT Meet this Requirement?	Explanation
	status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.				
f)	Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Yes		Supports	EM uses those attributes.
g)	Applications shall not override user selected contrast and color selections and other individual display attributes.	Yes		Supports	EM does not override system defaults.
h)	When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	No			No animation.
i)	Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Yes		Supports	Text is used to indicate information or action response.
j)	When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	No			Does not allow color adjustments.
k)	Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	No			No blinking text.
l)	When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for	No			No forms.

Section 1194.21 Software Applications and Operating Systems

ID	Criteria	Applicable	Notes	How does the EIT Meet this Requirement?	Explanation
	completion and submission of the form, including all directions and cues.				

Section 1194.22 Web-based Internet Information and Applications

ID	Criteria	Applicable	Notes	How does the EIT Meet this Requirement?	Explanation
a)	A text equivalent for every non-text element shall be provided (e.g., via “alt”, “longdesc”, or in element content).	Yes		Supports	Screen elements use text.
b)	Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	No			No multi-media.
c)	Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Yes		Supports	Information is in text
d)	Documents shall be organized so they are readable without requiring an associated style sheet.	Yes		Supports	Style sheets are not required for readable documentation
e)	Redundant text links shall be provided for each active region of a server-side image map.	No			No images
f)	Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	No			No image maps are used.
g)	Row and column headers shall be identified for data tables.	Yes		Supports	Any tabular data uses row and/or column headers.
h)	Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	No			Only one level.
i)	Frames shall be titled with text that facilitates frame identification and navigation	Yes		Supports	EM uses text titles.

Section 1194.22 Web-based Internet Information and Applications

ID	Criteria	Applicable	Notes	How does the EIT Meet this Requirement?	Explanation
j)	Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Yes		Supports	Standard browser formats are used.
k)	A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	No			No text only pages.
l)	When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Yes		Supports with exceptions.	Some script functions only effect back end functions and do not change the user interface.
m)	When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Yes		Supports	The user interface does not use an applet or plug-in but the running application requires JAVA.
n)	When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	No			No electronic forms.
o)	A method shall be provided that permits users to skip repetitive navigation links.	Yes		Supports	There are few if any repetitive tasks.
p)	When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	No			No timed responses.

Section 1194.31 Functional Performance Criteria

ID	Criteria	Applicable	Notes	How does the EIT Meet this Requirement?	Explanation
a)	At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Yes		Supports with exceptions	Most functions can be driven through Assistive Technologies but some will require keyboard or mouse input,
b)	At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Yes		Supports	Supports with Assistive Technologies
c)	At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided.	No			No audio in the application.
d)	Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced	No			No audio in the application.

Section 1194.31 Functional Performance Criteria					
ID	Criteria	Applicable	Notes	How does the EIT Meet this Requirement?	Explanation
	auditory fashion, or support for assistive hearing devices shall be provided.				
e)	At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	No			User speech is not used.
f)	At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Yes		Supports	Through Assistive Technologies the user interface can be used instead of a mouse.

Section 1194.41 Information, Documentation, and Support					
ID	Criteria	Applicable	Notes	How does the EIT Meet this Requirement?	Explanation
a)	Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charges.	Yes		Supports	Product documentation is provided in PDF format. Assistive Technologies can be used to convert the files to audio format.
b)	End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats, or alternate methods upon request, at no additional charge.	Yes		Supports with exceptions	Product documentation is provided in PDF format. Assistive Technologies can be used to convert the files to audio format. There is no description of accessibility

Section 1194.41 Information, Documentation, and Support

ID	Criteria	Applicable	Notes	How does the EIT Meet this Requirement?	Explanation
c)	Support services for products shall accommodate the communication needs of end-users with disabilities.	Yes		Supports	Clients can contact support either through the eService portal to electronically submit a request for assistance, entering a Service Request themselves via their local PC and typing in their question or issue. Assistive Technologies can be applied to assist users with disabilities. Alternately, they can call the toll free number for their geography, explain the issue to a receptionist at the Call Reception Center (CRC) who will then enter the Service Request on behalf of the initiator.
