

# Fly Above the Challenges of Cloud Migration

Securely migrating apps and data to the cloud is wrought with challenges. You need an experienced leader to help you get off the ground and provide continuous support and direction along the journey.

Unisys CloudForte® for Azure is a comprehensive managed services offering to help organizations securely migrate and manage their Microsoft Azure public cloud environments.

## Security-First Mindset

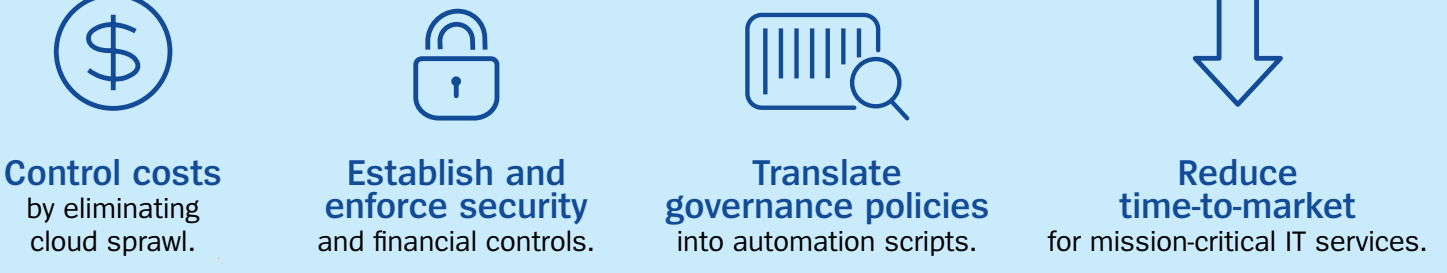

**Protect** data without sacrificing speed and efficiency.

**Proactively prevent** non-compliant resources from being created.

**Leverage** the latest cloud-native security services.

**Integrate** with Unisys Stealth® for extra protection through identity-driven microsegmentation.

## Automated Governance

## Moving to the Cloud? Don't Wing It, Do Cloud Right!

Use automated CloudForte for Azure features to optimize operations, enhance security, keep apps up to date and monitor cost, security, performance, reliability and operations.

### CloudForte Navigator

Unisys CloudForte Navigator™ provides a proven framework backed by expert cloud advisors that helps you build, operate and continually optimize secure, high-performing systems in the most cost-effective manner, especially in hybrid and public clouds.

### CloudForte Compliance

Unisys CloudForte Compliance™ drives operational improvement through integration with DevOps, multi-cloud environments and other advanced cloud architectures.

**33%**

of organizations see little or no improvement as a result of cloud adoption.<sup>1</sup>

**27%**

of business leaders that have not transitioned to the cloud specify security as a barrier to change.<sup>1</sup>

**46%**

of organizations found security concerns to be a challenge during migration.<sup>1</sup>

## The Critical Path to Cloud Done Right

According to a global Unisys study, 93% of organizations report being in transition to the cloud for their critical IT applications and computing systems. But their success will ultimately depend on the migration path they take—and many get flipped around or swept off course.<sup>1</sup>

More than **95%** of Fortune 500 companies trust their business on Azure today.<sup>2</sup>
