Unisys Collaborates with Fits Cargo and Expedite All to Advance Cargo Portal Services

New global routes and seamless last-mile ground delivery options empower shippers to move cargo smarter, faster, and all in one place.

BLUE BELL, Pa., May 7, 2026 – [Unisys](#) (NYSE: UIS) has expanded the booking capabilities of its [Cargo Portal Services](#) (CPS) through the onboarding of global cargo carrier [Fits Cargo](#), and a new partnership with [Expedite All](#), the largest small-truck carrier network in the United States. With more than 33,000 freight forwarding users, Cargo Portal Services provides air cargo carriers with a global platform to sell capacity to freight forwarders, enabling forwarders to efficiently price, book and track shipments.

By integrating Fits Cargo's worldwide network of carriers, Unisys CPS now offers shippers a wider variety of route options for global freight bookings. This collaboration extends the portal's global reach, enabling clients to deliver greater value by providing seamless access to an expansive, efficient shipping ecosystem.

Complementing the global air freight enhancements, Unisys has incorporated Expedite All's domestic ground delivery capabilities directly into CPS. This integration enables forwarders booking U.S.-bound shipments to coordinate last-mile pickup and delivery within a single, streamlined workflow. Together, these partnerships simplify the complexities of air and ground

logistics, reinforcing Unisys CPS as a trusted industry resource for end-to-end cargo management.

“Expanding our bookings with Fits Cargo and connecting ground delivery through Expedite All provides clients with more options and demonstrates how we’re helping shippers reimagine the logistics experience,” said Sean Tinney, senior vice president and general manager of Enterprise Computing Solutions (ECS), Unisys. “We’re empowering our clients to move freight smarter and faster, all within one trusted portal.”

Unisys CPS delivers freight forwarders and airlines benefits such as:

- **Increased visibility:** Optimize cargo utilization and streamline access for global forwarders.
- **24/7 access to capacity data and booking:** Reduce reliance on manual bookings and response times.
- **Expanded route options:** Real-time access to Fits Cargo flights, enhancing operational agility and decision-making.

“Our Small Truckload service is uniquely positioned to support air freight with speed, flexibility, and precision,” said Mike Ernst, president, Expedite All. “Through this integration, we’re making it easier for forwarders to access the right-sized capacity exactly when and where they need it.”
