

News Release

Unisys Selected as Technology Services Provider for the UK Government's Crown Commercial Service Technology Services 4 Framework

*The company will provide secure, modern technology services to support UK
public sector organisations*

LONDON / BLUE BELL, Pa., May 13, 2026 – [Unisys](#) (NYSE: UIS) has been selected as a technology services provider across all 6 lots within the UK Government [Crown Commercial Service \(CCS\) Technology Services \(TS4\) framework](#). The framework enables public sector organisations to procure pre-vetted technology partners for essential digital, operational and transformation services, with each service category — called a “lot” — [defined by CCS](#) as a structured grouping of related technology capabilities.

Through this appointment, public sector organisations across central government, healthcare, local authorities and emergency services gain a streamlined procurement process to access the company's full range of technology expertise.

“Our representation across every TS4 category reflects what our UK public sector partners already know – Unisys offers comprehensive market-leading IT services, expertise, and end-to-end capabilities to modernise, citizen-centric services,” said Michael Harounoff, senior sales director, EMEA, Unisys. “Government organisations face many challenges, from evolving cyber

threats to the pressures of ageing infrastructure. They need a trusted partner able to deliver resilient, cost-effective services for the public.”

CCS supports the public sector to achieve maximum commercial value when procuring common goods and services. From 2023 to 2024, CCS helped the public sector achieve commercial benefits of £4.9 billion, supporting world-class public services that deliver best value for taxpayers. To participate in TS4, Unisys completed an extensive review process that included detailed case studies and demonstrations of its technical competence across all 6 lots.

Through TS4, Unisys provides the following services:

- **Lot 1 - Technology Strategy and Service Design:** Technology and digital consultancy services supporting secure architecture and strategic planning.
- **Lot 2 - Transition and Service Integration and Management (SIAM):** Transition, integration and SIAM services for complex multi-supplier environments.
- **Lot 3/3a - End User Service:** Modern workplace solutions, including end-user support, computing and device management services.
- **Lot 4/4a - Infrastructure Management:** IT operations, data centre support, security management and technology estate service management, including AI-enabled insights.
- **Lot 5/5a - Application and Data Management:** Application development and management, data warehouse, database and data management.
- **Lot 6 - Major Technology Services Transformation Programmes:** Delivery services for multi-tower, end-to-end modernisation.

This TS4 selection follows the [European Commission](#)'s selection of Unisys as part of the EU Cybersafe Consortium to deliver critical cybersecurity operations to 71 EU institutions under the Cybersecurity Professional Services Framework Contract.
