

Agile Business Suite Runtime 10.0 for Windows

Product Information Sheet

Unisys Agile Business Suite is a low-code development platform that enables IT organizations to rapidly build, deploy, run and maintain business-critical applications for multiple operating environments. Agile Business Suite Runtime for Windows provides the infrastructure that manages and supports applications that are generated by Agile Business Suite Developer and runs in Microsoft® Windows environment.

Product overview

Using Agile Business Suite Developer, you can define a platform-independent model (PIM) of a business application and generate it for: Microsoft Windows, Unisys ClearPath® MCP and ClearPath® OS 2200. The generated solution can include online transactions, batch reports, the database, and a variety of end-user and programmatic interfaces.

Regardless of the platform choice, Agile Business Suite optimizes the generated solution for that operating environment.

Product highlights

Agile Business Suite Runtime for Windows supports:

- Generated transactions, reports and database tables that are optimized for the Windows environment
- Configurations where the database server is separate from the application server
- An infrastructure that includes database audit and recovery routines, so you don't need to code these high availability capabilities in the model yourself
- An administration utility and API, which manages the deployment and maintenance activities of the Agile Business Suite run-time components
- Intersystem communications mechanisms that enable generated Agile Business Suite solutions to seamlessly interact with other applications
- Bidirectional web services communication
- A wide range of front-end client options, including native ASP.NET MVC and WPF, as well as the classic component enabler-supported client types

Software requirements

AB Suite Runtime for Windows software requires one of the below:

- Windows Server 2025 (LTSC) Standard, Datacenter Editions

- Windows Server 2022 (LTSC) Standard, Datacenter Editions
- Windows Server 2019 (LTSC) Standard, Datacenter Editions
- SQL Server 2022 Enterprise, Standard Editions

What's new?

Stronger Security with Modern TLS Standards

- Supports modern cryptographic standards for improved security posture and regulatory alignment
- Encryption capability is configuration-driven, allowing controlled rollout
- Uses MSOLEDB 19 to enable TLS 1.3 data-in-transit encryption between application and database tiers

Future-Ready Networking with IPv6 Compatibility

- End-to-end IPv6 support across:
 - AB Suite Builder
 - Deployment tooling
 - Windows Runtime
 - Runtime utilities
- Fully operational in IPv4, IPv6, and dual-stack environments, supporting modern enterprise networks

Enterprise-Grade Compliance with SQL Server Encryption Policies

- Fully aligned with SQL Server Force Encryption and Strict Force Encryption settings
- Automatic enforcement of encryption when SQL Server mandates it, with clear notification to administrators
- Ensures consistent, policy-driven security across environments

Summary

Agile Business Suite Runtime for Windows provides an enterprise-class infrastructure for your transaction-oriented business solutions. With Agile Business Suite, you can define, generate and run business-critical applications.
