### **News Release**

## Unisys Announces Second-Quarter 2017 Financial Results and Reaffirms Full-Year Financial Guidance

#### **Full-Year Guidance**

 Unisys reaffirms full-year 2017 guidance for revenue of \$2.65-2.75 billion, non-GAAP operating profit margin of 7.25-8.25 percent and adjusted free cash flow of \$130-170 million

#### 1H 17

- Services gross margin up 70 basis points year over year, Services operating profit margin up 20 basis points year over year
- Services segment revenue decline of 4 percent year over year, an improvement of 300 basis points versus rate in prior-year period (3 percent year-over-year decline in constant currency<sup>(2)</sup>)
- Total revenue of \$1,331 million, a 6 percent decline year over year (5 percent decline year over year in constant currency)
- Operating profit margin of (2) percent; Non-GAAP operating profit<sup>(4)</sup> margin of 5 percent
- New business TCV<sup>(1)</sup> up 65 percent year over year

#### 2Q 17

- Total revenue of \$666 million, versus \$749 million in the prior-year period, impacted in part as expected by lower Technology revenues year over year
- Operating profit margin of (4) percent; Non-GAAP operating profit margin of 4 percent
- New business TCV up 74 percent year over year
- Services backlog relatively flat sequentially at \$3.7 billion
- Successfully closed \$440 million Senior Secured Notes offering

**BLUE BELL**, **Pa.**, **August 1**, **2017** – Unisys Corporation (NYSE: UIS) today reported second-quarter and first-half 2017 financial results. The company's Services segment saw year-to-date gross and operating margin expansion of 70 basis points and 20 basis points, respectively, year over year. Services revenue for the first half was down 4 percent year over year (3 percent on a constant-currency basis), an improvement of 300 basis points versus the prior-year period. Total TCV, which includes

renewals and extensions that can vary period to period, was down 12 percent year over year for the first half. However, excluding U.S. Federal (which faced a difficult year-over-year comparison due to a large renewal in the second quarter 2016) TCV was up 7 percent year over year for the first half. New business TCV was up 65 percent year over year for the first half. For the second quarter 2017, total TCV was down 31 percent year over year, impacted by the U.S. Federal renewal and Technology renewal timing. Excluding these impacts, TCV was up 5 percent year over year in the second quarter. New business TCV was up 74 percent year over year in the second quarter. The entirety of the year-over-year decline in U.S. Federal TCV for the first half was due to a single large renewal in the prior-year period, which also was almost entirely responsible for the year-over-year decline in the second quarter 2017 U.S. Federal TCV. Services backlog was roughly flat sequentially at \$3.7 billion.

"For our first half, our results continued to indicate progress against our key strategic and financial goals," said Unisys President and CEO Peter Altabef. "While we saw some year-over-year variability during the second quarter, in part due to a very difficult compare for our Technology segment, we continue to see improvement in our go-to-market efforts."

#### **Summary of First-Half 2017 Business Results**

#### Company:

As expected, results for the second quarter and first half of 2017 were impacted in part by a difficult year-over-year comparison in the second quarter 2017 in the Technology segment. That segment saw growth of 31 percent in the second quarter 2016, and was down 32 percent in the second quarter 2017, which impacted total company revenue and margin year-over-year compares, both for the second quarter and first half.

Revenue year to date of \$1,331 million was down 6 percent versus the first half 2016, down 5 percent year over year on a constant-currency basis. First-half 2017 operating profit margin was (2) percent, which includes cost-reduction and other charges and pension expense, relative to 2 percent in the prior-year period. Non-GAAP operating profit margin was 5 percent, versus 7 percent in the first half 2016. Both revenue and margin year-over-year comparisons were impacted by the difficult second quarter Technology compare.

Net loss attributable to Unisys Corporation common shareholders for the first half was \$75 million, relative to a loss of \$18 million in the prior-year period. Adjusted EBITDA<sup>(5)</sup> for the first half was \$150

million, versus \$184 million in the first half of 2016. Adjusted EBITDA margin for the first half was 11 percent, relative to 13 percent in the prior-year period.

In the first half 2017, operating cash flow was \$(90) million, relative to \$57 million in the prior-year period. The company saw free cash flow<sup>(3)</sup> of \$(172) million year to date, versus \$(13) million in the first half of 2016. Adjusted free cash flow<sup>(6)</sup> year to date was \$(72) million versus \$90 million in the prior-year period. Reductions in cash flow year over year were largely due to payment timing, including related to technology invoices sent at the end of the second quarter 2017 which are expected to be collected in early third quarter 2017 (including a \$35 million invoice related to a single contract that was signed and expected to be collected in the second quarter 2017 but was received in the first week of July), in addition to the lower operating profit noted above.

At June 30, 2017, the company had \$571 million in cash and cash equivalents.

#### Services:

Services revenue, which represented 87 percent of first-half total revenue, declined at a more modest rate than during the prior-year period, with a decline of 4 percent year over year as reported (a 300 basis point improvement relative to the prior year) and a decline of 3 percent in constant currency to \$1,160 million for the first half of 2017. Services backlog ended the first half at \$3.7 billion, relatively flat sequentially. Services gross margin was up 70 basis points year to date versus the first half 2016 to 16 percent. Services operating profit margin was up 20 basis points to 2 percent. Margins in the Services segment were helped by a particularly profitable transaction in the first quarter, as previously disclosed.

#### Technology:

Technology year-to-date revenue, which represented 13 percent of total first-half revenue, was down 18 percent year over year to \$171 million, down 17 percent in constant currency. Technology gross margin for the first half was 53 percent, versus 60 percent in the prior-year period, and Technology operating profit margin was 26 percent, relative to 37 percent in the prior-year period. These comparisons were impacted by the difficult second-quarter comparison for this segment, as mentioned above.

#### **Summary of Second-Quarter 2017 Business Results**

#### Company:

Revenue for the second quarter of \$666 million was down 11 percent relative to the second quarter 2016, down 10 percent year over year on a constant-currency basis. Second-quarter 2017 operating

profit margin was (4) percent, which includes cost-reduction and other charges and pension expense, versus 7 percent in the prior-year period. Non-GAAP operating profit margin was 4 percent, versus 11 percent in the second quarter 2016. Both revenue and margin comparisons were impacted by the difficult year-over-year comparison in the Technology segment for the quarter.

Net loss attributable to Unisys Corporation common shareholders for the quarter was \$42 million, relative to earnings of \$22 million in the prior-year period. Adjusted EBITDA for the quarter was \$66 million, relative to \$124 million in the second quarter 2016. Adjusted EBITDA margin for the quarter was 10 percent, versus 17 percent in the prior-year period.

In the second quarter 2017, operating cash flow was \$(49) million, versus \$31 million in the second quarter 2016. The company saw free cash flow of \$(96) million for the quarter, relative to \$(3) million in the prior-year period. Adjusted free cash flow for the quarter was \$(46) million, versus \$51 million in the second quarter last year. Reductions in cash flow year over year were largely due to the timing of payments, in addition to the lower operating profit, both noted above.

During the second quarter, the company successfully closed a \$440 million Senior Secured Notes offering, the net proceeds of which are reflected in the closing cash balance for the quarter.

#### Services:

Services revenue, which represented 86 percent of second-quarter total revenue, declined by 6 percent as reported and 5 percent in constant currency to \$575 million. Services gross margin was 14 percent versus 17 percent in the second quarter 2016, in part due to ongoing investments in the Services business, consistent with our go-to-market strategy. Services operating profit margin was (2) percent, versus 2 percent in the prior-year period.

#### Technology:

Technology revenue, which represented 14 percent of total revenue, was down 32 percent year over year to \$91 million, down 30 percent in constant currency. Technology revenue was up 31 percent year over year in the second quarter of 2016, creating a very difficult compare. Technology gross margin was 59 percent, versus 67 percent in the prior-year period. Technology operating profit margin was 36 percent, relative to 48 percent in the prior-year period. Both gross and operating profit margin for Technology were impacted by lower revenues, given the fixed-cost nature of the business.

#### **Continued Execution on Business Strategy**

The company in the second quarter entered into several key contracts in each of its sectors:

- <u>U.S. Federal</u>: Unisys signed a contract with a U.S. government agency to provide a biometrics-based identity and access management solution critical to the agency's operations.
- <u>Public</u>: Unisys signed a contract with The California State University (CSU) -- the largest fouryear university system in the U.S. -- for an analytics-based hybrid-cloud solution to transform system-wide delivery of educational and administrative services to over half a million CSU students, faculty and staff.
- <u>Commercial</u>: Unisys expanded its long-standing relationship with Starbucks, signing new multiyear agreements for infrastructure and end user support services in both Europe and China.
- <u>Financial Services</u>: Signed an agreement with a leading European private-banking institution to implement cloud-based Unisys ClearPath Forward<sup>®</sup> software supporting the bank's digital transformation and omni-channel banking initiatives.

#### **Conference Call**

Unisys will hold a conference call today at 5:30 p.m. Eastern Time to discuss its results. The listen-only webcast, as well as the accompanying presentation materials, can be accessed on the Unisys Investor website at <a href="https://www.unisys.com/investor">www.unisys.com/investor</a>. Following the call, an audio replay of the webcast, and accompanying presentation materials, can be accessed through the same link.

- (1) **Total Contract Value** TCV is the estimated total contractual revenue related to signed contracts including option years and without regard for cancellation. New business TCV represents TCV attributable to new scope for existing clients and new logo contracts.
- <sup>(2)</sup> **Constant currency** The company refers to growth rates in constant currency or on a constant currency basis so that the business results can be viewed without the impact of fluctuations in foreign currency exchange rates to facilitate comparisons of the company's business performance from one period to another. Constant currency is calculated by retranslating current and prior period results at a consistent rate.

#### **Non-GAAP** and Other Information

Although appropriate under generally accepted accounting principles (GAAP), the company's results reflect charges that the company believes are not indicative of its ongoing operations and that can make its profitability and liquidity results difficult to compare to prior periods, anticipated future periods,

or to its competitors' results. These items consist of pension and cost-reduction and other expense. Management believes each of these items can distort the visibility of trends associated with the company's ongoing performance. Management also believes that the evaluation of the company's financial performance can be enhanced by use of supplemental presentation of its results that exclude the impact of these items in order to enhance consistency and comparativeness with prior or future period results. The following measures are often provided and utilized by the company's management, analysts, and investors to enhance comparability of year-over-year results, as well as to compare results to other companies in our industry.

- (3) **Free cash flow** The company defines free cash flow as cash flow from operations less capital expenditures. Management believes this liquidity measure gives investors an additional perspective on cash flow from on-going operating activities in excess of amounts required for reinvestment.
- (4) **Non-GAAP operating profit** The company recorded pretax pension expense and pretax charges in connection with cost-reduction activities and other expenses. For the company, non-GAAP operating profit excluded these items. The company believes that this profitability measure is more indicative of the company's operating results and aligns those results to the company's external guidance which is used by the company's management to allocate resources and may be used by analysts and investors to gauge the company's ongoing performance.
- ("EBITDA & adjusted EBITDA Earnings before interest, taxes, depreciation and amortization ("EBITDA") is calculated by starting with net income (loss) attributable to Unisys Corporation common shareholders and adding or subtracting the following items: net income attributable to noncontrolling interests, interest expense (net of interest income), provision for income taxes, depreciation and amortization. Adjusted EBITDA further excludes pension expense, cost-reduction and other expense, non-cash share-based expense, and other (income) expense adjustment. In order to provide investors with additional understanding of the company's operating results, these charges are excluded from the adjusted EBITDA calculation.
- (6) **Adjusted free cash flow** Because inclusion of the company's pension contributions and cost-reduction and other payments in free cash flow may distort the visibility of the company's ability to generate cash flow from its operations without the impact of these non-operational costs, management believes that investors may be interested in adjusted free cash flow, which provides free cash flow before these payments and is more indicative of its on-going operations. This liquidity measure was

provided to analysts and investors in the form of external guidance and is used by management to measure operating liquidity.

(7) **Non-GAAP** diluted earnings per share - The company has recorded pension expense and charges in connection with cost-reduction activities and other expenses. Management believes that investors may have a better understanding of the company's performance and return to shareholders by excluding these charges from the GAAP diluted earnings/loss per share calculations. The tax amounts presented for these items for the calculation of non-GAAP diluted earnings per share include the current and deferred tax expense and benefits recognized under GAAP for these amounts.

#### **About Unisys**

Unisys is a global information technology company that specializes in providing industry-focused solutions integrated with leading-edge security to clients in the government, financial services and commercial markets. Unisys offerings include security solutions, advanced data analytics, cloud and infrastructure services, application services and application and server software. For more information, visit www.unisys.com.

#### **Forward-Looking Statements**

Any statements contained in this release that are not historical facts are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, but are not limited to, any projections of earnings, revenues, total contract value or other financial items; any statements of the company's plans, strategies or objectives for future operations; statements regarding future economic conditions or performance; and any statements of belief or expectation. All forward-looking statements rely on assumptions and are subject to various risks and uncertainties that could cause actual results to differ materially from expectations. In particular, statements concerning total contract value are based, in part, on the assumption that all options of the contracts included in the calculation of such value will be exercised and that each of those contracts will continue for their full contracted term. Risks and uncertainties that could affect the company's future results include the company's ability to effectively anticipate and respond to volatility and rapid technological innovation in its industry; the company's ability to improve margins in its services business; the company's ability to sell new products while maintaining its installed base in its technology business; the company's ability to access financing markets to refinance its outstanding debt; the company's ability to realize anticipated cost savings and to successfully implement its cost reduction initiatives to drive efficiencies across all of its operations; the company's significant pension obligations and requirements to make

significant cash contributions to its defined benefit plans; the company's ability to attract, motivate and retain experienced and knowledgeable personnel in key positions; the risks of doing business internationally when a significant portion of the company's revenue is derived from international operations; the potential adverse effects of aggressive competition in the information services and technology marketplace; the company's ability to retain significant clients; the company's contracts may not be as profitable as expected or provide the expected level of revenues; cybersecurity breaches could result in significant costs and could harm the company's business and reputation; a significant disruption in the company's IT systems could adversely affect the company's business and reputation; the company may face damage to its reputation or legal liability if its clients are not satisfied with its services or products; the performance and capabilities of third parties with whom the company has commercial relationships; the adverse effects of global economic conditions, acts of war, terrorism or natural disasters; contracts with U.S. governmental agencies may subject the company to audits, criminal penalties, sanctions and other expenses and fines; the potential for intellectual property infringement claims to be asserted against the company or its clients; the possibility that pending litigation could affect the company's results of operations or cash flow; the business and financial risk in implementing future dispositions or acquisitions; and the company's consideration of all available information following the end of the quarter and before the filing of the Form 10-Q and the possible impact of this subsequent event information on its financial statements for the reporting period. Additional discussion of factors that could affect the company's future results is contained in its periodic filings with the Securities and Exchange Commission. The company assumes no obligation to update any forward-looking statements.
